Lake-Sumter EMS Signs On With ePro Scheduler

DALLAS, TX July 24, 2007 - Florida based EMS operation Lake-Sumter joins scores of other operations around the nation in signing up for *ePro Scheduler*, eCore Software's Human Resource Management software suite complete with eCore's biometric time & attendance device, the *ePro BioClocks*.

Lake-Sumter plans to have the program rolled out and in the hands of employees the next quarter. Providing scheduling, time & attendance, and payroll all rolled into a user-friendly web-based software package, *ePro Scheduler* saves employees and supervisors time and money.

Employees can easily access their schedules via the Internet. They can submit requests for time-off, shift pickups, and shift swaps all from the web. *ePro BioClocks* eliminate common time & attendance recording errors by having employees punch in using their own fingerprints.

About eCore Software

eCore Software Inc. has been a leading provider of HR management solutions to Public Service industry operations like EMS companies, fire departments and police departments since 1998.
