

**FOR IMMEDIATE RELEASE**

**eCore Adopts ePro Branding for all Major Products**

Dallas, Texas – September 08, 2006

Dallas, Texas – September 08, 2006 – eCore Software Inc. today announced the re-branding of their major product offerings. Slated to roll out on September 10<sup>th</sup>, ePro Scheduler, version 5.0 (formerly Net Scheduler Pro) and ePro Manager, Version 3.0 (formerly Net Manager Pro), will sport a new look and a new name. Riding the success of the ePro BioClock biometric time & attendance solution, eCore's decision to standardize the ePro line of web-based and Internet enabled products is a natural progression as eCore continues to expand the reach of their major products.

The release also features new functionality for both products as eCore continues to refine existing functions based on customer feedback. ePro Scheduler provides web-based scheduling, time & attendance, and payroll. Its functionality can be adapted to any operation workflow, no matter how big or how complex. ePro Manager provides records management and continuing education for public service organizations like EMS operations, fire departments and police departments.
