eCore Rolls Out AmbuTRAK Inventory Interface

DALLAS, TX August 5, 2008 – eCore Software is pleased to announce the successful integration of eCore Software's ePro Manager record management system with EMS Technology Solutions, LLC's AmbuTRAK, a full featured EMS inventory management software package. The integration marks the first functionally coupled interface using the Secure Data Exchange (SDE) software, eCore's generic vendor interface package that allows our web-based products to easily integrate with other vendor software.

AmbuTRAK (<http://www.ambutrak.com>) is web-based inventory control software guaranteed to save both time and money for emergency service providers. It's a simple, easy-to-use system that keeps track of all inventory and supplies electronically – from on board the ambulance to the supply warehouse. ePro Manager (<http://www.eCoreSoftware.com/products/eProManager.asp>) is a web-based record management system with several components including fleet management and full inventory management. By offering AmbuTRAK as an in-board inventory solution integrated with ePro Manager, eCore can now offer a one-of-a-kind EMS inventory/fleet solution with the strongest components available from each product.

Patrick Fitzsimmons, President of eCore Software Inc., speaks of the ease that the partnership provides customers, "We are excited to partner with AmbuTRAK as they roll out their solution for our customers. We can quickly offer bar code scanning to our customers through AmbuTRAK. As their product evolves, our common customers will get the best inventory and checklist software in the market but will not have to be concerned with common, duplicate data because of the coupled interface. We are very excited about the direction the AmbuTRAK product is going, including RFID processing as the technology matures."

Shane Garrison, President of EMS Technology Solutions, LLC, says, "The integration between eCore's ePro Manager Software and the AmbuTRAK EMS Inventory Control System is seamless. The power and flexibility that these two software packages offer is unmatched. The combination of the two products allows users to see an immediate return on investment."

About EMS Technology Solutions, LLC and AmbuTRAK

EMS Technology Solutions, LLC, provides custom technology solutions specific to the Emergency Medical Services industry since 2006. In 2007 EMS Technology Solutions released AmbuTRAK Inventory Management, a web-based inventory management solution that provides real time inventory control management for their customers.
