

“For complex scheduling and time & attendance, I recommend ePro Scheduler and ePro BioClock Smart Clocks.”

Jack Eades, Executive Director
Medstar Emergency Medical Services
Fort Worth, TX

ePro BioClock *Biometric Time & Attendance*

eCore introduces time and attendance recording using biometric fingerprint scanning technology. ePro BioClocks integrate the latest biometric technology into our time and attendance solutions.

The Smart Clock Feature provides real-time feedback from employees in the field.

Our unique design allows you to install an ePro BioClock at any location and synchronize it to your ePro Scheduler. Live updates provide automatic synchronization and data upload to the server.

ePro BioClocks are the affordable time & attendance solution for any operation.

Smart Clock Feature

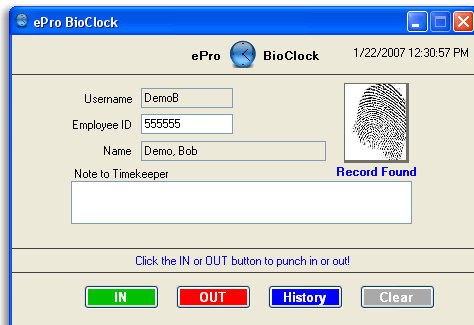

eCore Software Inc. is pleased to announce the newest release of our ePro BioClock biometric time & attendance system. The Smart Clock feature provides real-time updates to our popular web-based ePro Scheduler system.

- Force employees to enter comments when clocking in or out early or late for scheduled shifts.
- Disallows clock in if essential certifications are expired.

•Attendance Recording

To clock in or out, employees simply enter their username or employee ID, then place their finger on the fingerprint scanner. If their fingerprint match is found in the database, they can clock in or out.

- Completely eliminate buddy punching
- Eliminate the cost of employee badges and bar codes

Employee Enrollment

Enroll employees by scanning their fingerprints into the ePro BioClock system. Once they are enrolled, they can use ePro BioClocks to clock in and out. Synchronizing fingerprint records to ePro Scheduler makes the prints available to any ePro BioClock installed at remote locations in the field.

“Through state of the art technology, Smart Clocks integrated with ePro Scheduler provide the most cost effective scheduling and time & attendance system on the market.”

Live Updates

If a live Internet connection is available on your ePro BioClock system, employee attendance records will automatically upload to ePro Scheduler. Fingerprint records are synchronized once per day. New fingerprint records are downloaded to the ePro BioClock so new employees can record attendance at any location.
