

ePro ConEd is a cost effective & flexible web-based continuing education solution that easily adapts to all your organization's Con Ed needs.

With ePro ConEd, employees go online to take courses or enroll for classroom courses designed by managers. Online courses provide managers tools to upload or embed media and create multiple choice questions. As employees successfully complete an online course, managers are notified, and a certificate is generated that can be saved or printed.

With classroom courses, employees enroll online, and managers take attendance and set pass/fail status. At the end of the course, managers generate batch certificates with signature lines to print and distribute to employees that successfully complete the course. Detailed reporting provides perspective regarding credit hours as they relate to specific licenses and certifications.

ePro ConEd is designed to reduce costs and administrative time by allowing employees to take online courses when possible. When classroom attendance is required, ePro ConEd provides the right tools to make credit management easy and efficient. Stay organized and save time with ePro ConEd!

ePro ConEd is available as a standalone web-based tool, or can be used with ePro Scheduler, eCore's employee scheduling and timekeeping solution, ePro Fleet, ePro Tracker, and ePro Inventory, all via a single login.

### Key Features

- Create online & classroom courses
- Upload or embed media & create multiple choice questions
- Receive notifications as employees complete courses
- Track credit hours as they relate to specific licenses
- Receive nightly reports showing employees with expiring certifications
- Generate and print certificates with your company logo
