

## ePro Fleet is your go-to solution for all your fleet management and maintenance needs.

With ePro Fleet, managers create detailed profiles and assign custom pre-ventive maintenance schedules for every vehicle. Field employees go online to report vehicle problems and submit custom check-sheets. As problem reports and check-sheets are submitted, and mileage thresholds exceeded, preventive maintenance alerts are automatically triggered.

The management side of ePro Fleet supports agencies that outsource maintenance, handle maintenance in-house, or a combination of the two. As problem reports are generated, and preventive maintenance alerts triggered, managers create work tickets, add tasks and notes, track costs, and upload files such as an invoice. All work tickets are stored indefinitely for quick access to historical data.

Detailed reporting in ePro Fleet allows you to see how much vehicles cost to operate down to the mile, and preventive maintenance reports project upcoming maintenance to help you stay ahead of the game. ePro Fleet saves you time and keeps you organized. Keep your vehicles on the road and ready with ePro Fleet!

*ePro Fleet is available as a standalone web-based tool, or can be used with ePro Scheduler, eCore's employee scheduling and timekeeping solution, ePro Tracker, ePro ConEd, and ePro Inventory, all via a single login.*

### Key Features

- Create custom preventive maintenance schedules
- Employees report problems from the field
- Create detailed work tickets
- Track vehicle cost down to the mile
- Create custom vehicle checksheets
- Preventive maintenance alerts based on miles and hours
- Track fuel cost with import from Fuelman and similar services
- Detailed maintenance reporting
